

Kopano cleanup

These scripts and tools are provided to help you manage your Kopano system. They are provided as a free service for Kopano users, without warranty of any kind.

Please be aware that usage is at your own risk!

The following script allow you to automatically delete all items older than x days in a users **Junk E-mail** and **Deleted Items** folder.

The latest version of the script can be found in the 'Core Scripts' Bitbucket repository: <https://stash.kopano.io/projects/KSC/repos/core-tools/browse/kopano-cleanup>
